

How to Install the SermonShots Repurposed Plugin

1 Log in to WordPress Admin

- Go to your WordPress dashboard by logging in at: **yourwebsite.com/wp-admin**.

2 Go to Plugins Menu

- In the left-hand sidebar, click **Plugins** → **Add New**.

3 Upload the Plugin ZIP

- At the top of the page, click the **Upload Plugin** button.
- Click **Choose File**, then locate the **sermonshots-repurposed.zip** file you downloaded.
- Click **Install Now**.

4 Activate the Plugin

- Once installed, click **Activate Plugin**.
- The **SermonShots** Repurposed plugin will now appear in your plugin list.

5 Enter API Settings

- In your WordPress dashboard, go to **Settings** → **SermonShots**.
- Paste in your API Key from the **SermonShots** dashboard.
- Click **Save Changes**.

6 Add Content with the Plugin

- Open any post or page in the block editor.
- Add a **SermonShots Repurposed Block**.
- Enter the video ID or select the content you want to display (clips, captions, devotionals, etc.).
- Preview to confirm it displays correctly, then publish your post.
